Product	Model No.	Ordering No.
Charging station without chargers	SR 506	T06-0108
Charging station, complete	SR 516	T06-0111

## Product description

The charging station is a practical aid for charging the batteries of the Sundström SR 500 fan. The station is available in unassembled condition, designated SR 506, and can then be fitted with 1–5 chargers, as required. The SR 516 is delivered complete, with 5 type 2541 chargers fitted. This charger senses the battery condition and provides optimum charging conditions, with the shortest possible charging time. The earlier type 9940 charger model does not have this function and should not be used as the charger base. The model number is marked on the rear of the charger.

The **SR 506** is delivered in unassembled condition, without charger and batteries.

The **SR 516** is delivered with 5 chargers and without batteries.

Slots are provided for wall mounting.

## Technical specification

SR 506 / SR 516	
Weight without chargers	approx. 3,460 g
Weight with 5 chargers	approx. 4,560 g
WxDxH, SR 506	390x328x105 mm
Material	ABS
Colour	Grey
